FLOUTING NATURE

Biologists of Johns Hopkins University have just issued a report outlining their conclusions, after an exhaustive comparative study, of "superiority" among various races of mankind.

It should be interesting to the white nations, because it shows that, while at present the "Nordic" is occupying a dominant place in world affairs, he is dissipating his superiority as fast as a sickly sentimental social system will let him.

This report premises that some races are undeniably inferior, and that the Chinese, Pacific Islanders and Negroid types are unmistakably regressive.

In tests of average mentality the Jews come first, Chinese second, and the Japanese, Caucasians and certain Indian peoples third. The Jews have the largest proportion of superior individuals and very few idiots, imbeciles or morons.

The reason the Jews stand at the head of the list, say these biologists, is that for a thousand years racial intolerance and persecution have weeded out the weak. Medieval gridirons and howling Christian zealots made short shift of the inferior strains in the Jewish race.

Similarly in China. The Chinese too stupid or lazy to take care of himself starved to death long ago.

It is nature's way of improving the race. Those unfit to live are crowded out. Only those who are mentally and physically progressive remain to breed their kind.

But the Caucasian, the "Nordic," is frittering away his superiority diluting his racial intelligence and poisoning his ancestral wells by breeding inferior types and neglecting the simple principles of scientific breeding.

Incurable morons are permitted to propagate at will. Society takes mental and physical weakness of the most hopeless types and even encourages them to breed and pollute the race with their inferior offspring.

And unless he soon gives serious thought to the improvement of his breed, only an age of persecution and hardship can save him from sinking into hopeless inferiority with a million of degeneracy around his neck.

EDUCATOR OR MAGICIAN?

Sir James Aikins tells the Canadian Bar Association that the urgent need of the day is to eliminate the crooked lawyer from modern business life.

It is certainly an urgent need. And to the honor of the legal profession be it said that Bar Associations do not hesitate to discipline their members who stray from the fold of honesty and fair dealing.

But by far and away the greatest professional need today is to instill into the minds of doctors, lawyers and all professional men that they are educators rather than magicians.

The average doctor, for instance, instead of educating the public how to live a hygienic, sanitary and rational life, simply does out his store of medical knowledge in mystic symbols as reluctantly as the medieval witch used to part with love philters.

Many a doctor or lawyer, instead of conceiving himself as an educator, the doctor as a teacher of healthful living and the lawyer as a teacher of lawful behavior, regards himself as having the valuable key to a kind of esoteric knowledge.

That attitude is more befitting the witchcraft of medicines rather than the high mission of law and medicine's future.

SCIENCE IN INDUSTRY

Industrial reports from Washington show that the production of rayon for the first seven months of 1925 has reached 200,000,000 pounds.

1/2 lb
Package

Now your grocer has the cheese you like so well in this handy size.

with prospects of steady growth ahead.

In point of production, rayon, or artificial silk, has already passed natural silk by a wide margin. Last year the world output of cotton was 9,000,000,000 pounds, wool 1,600,000,000 pounds, and rayon only 100,000,000 pounds.

The tremendous increase in rayon production looms up as a serious competitor to wool and cotton and indicates a revolution in the textile industry.

Rayon was invented 40 years ago by a Frenchman, Count de Chardonnet, who manufactured a lustrous fibre by treating cotton linters with nitric acid and pressing the resulting nitrocellulose through small dies into a coagulating solution.

Subsequently wood pulp was employed as well as cotton linters and other important improvements effected in the process.

Today the cheapness of the process and the consequent increase in the profits are indicated by the deep mystery with which rayon manufacturing companies are shielding their statements.

Science has become more important in industry than the normal processes of nature.

LITTLE GRANDMOTHERS TO THE WORLD

One Clinton R. Morse, whom news dispatches describe as director of the University of California Men's Glee Club, has issued the dictum that no student will be taken on tour with the club unless he equips himself with gravitas.

This is one item of legislation that Tennessee and some other states seem to have overlooked.

Mortality can never be complete in the Bible Belt until every article of clothing, every article of food and even one's thoughts are strictly censored by the legislature.

It is strange to find this petty paternalism in a democracy, where every person is supposed to be born free, equal and sovereign.

Can it be that these little grandmothers to the world are trying to lay down the amazing proposition that in a democracy the people, as a mass, are omniscient, and individually the rankest kind of fools, without enough common sense to voluntarily keep up their own socks?

HARNESSING THE TIDES OF FUNDY.

Still the conquest of mankind in subjugating the natural forces goes on, urged by indomitable determination to make the last of these a slave in perpetuity. The centuries have recorded progress in this domination.

In succession, one after another, fire, steam, electricity, the attenuated spark which carries the human voice across the seas, have yielded and become willing and tractable servants. But one great dream of the ages has not been realized.

This is the hope that even the tides may be tamed and their tremendous wasted power made to turn the wheels of industry, warm and light the homes of millions, and thus conserve or render next to valueless the mineral fuel deposits upon which dependence is now placed.

Encouraged by the success of what were regarded as insurmountable undertakings along this line, engineers have declared the feasibility, by methods which have been proved practical, of developing, at points where conditions are favorable, an almost unlimited volume of energy from these shifting ocean currents. Definite proposals have been made to demonstrate this claim

in the Bay of Fundy, just off the coast of the state of Maine at Eastport. The promoter of this project is Dexter P. Cooper, who was associated with his brother, Hugh L. Cooper, in the successful effort to harness Niagara falls, and in the building of the great hydroelectric power plant at Keokuk, Ia., on the Mississippi river.

Such an indorsement of the plan to harness and utilize the Fundy tides removes the enterprise from the realm of speculation. It is promised that with an outlay of approximately \$75,000,000 there can be generated and distributed energy representing from 500,000 to 700,000 horsepower perpetually. This, it is explained, is twice the power which it is proposed to generate at Muscle Shoals. At its session last winter the Maine legislature considered the proposal to grant a charter authorizing a corporation to be later formed to proceed with this development. But as the project was one which combined the proposal to market a part of the power thus developed in sections outside the state, it was deemed prudent to submit the plan to the people for their decision. It is announced that Gov. Ralph O. Brewster, the present chief executive, has given his sanction to the plan, pending the result of the popular referendum, which will take place on Sept. 14, less than a month hence.

The thought of the people in countries other than the United States is turning to the possibility of similar development. England is conducting extensive experiments at the mouth of the Severn. France also is investigating possible sources of power at the mouth of her rivers.

What might not have been an economic possibility a century, or even a half century ago, is now made almost an economic necessity. The use of power, whether generated by coal or fuel oils, is more general now than at any previous time. And with the increased use of power there has come an era of high coal prices, coupled with what is felt to be the uncertainty of a continuous petroleum supply. Then, too, it has been only within recent years, comparatively, that the possibility of transmitting hydroelectric power long distances without considerable loss was proved. The market for the horsepower from the tides of Fundy may be a thousand miles inland. The possibilities of the plan are too great to be easily estimated, or even comprehended.

Maine, it would seem, has much to gain and nothing to lose by the carrying out of this great development project. The initial investment will be in the neighborhood of \$75,000,000 or more, and much of this will be paid to workmen and for materials which the quarries and factories of the state will supply.

On the Rance river at St. Malo, in France, on the Severn at its mouth, in England, and in the Bay of Fundy between Maine and New Brunswick, the tides run higher than at any other point in the world, the range being the highest in the latter place. By range is meant the vertical measure from the highest mark reached at flood to the lowest mark at ebb of consecutive tides. There, in ceaseless undulations, the ocean offers its tireless energy as a constructive force to be utilized for the comfort, happiness and well-being of mankind. It is in testimony of appreciation of this that it is now proposed to reach out and make practical use of this kindly and generous gift.

Man's domination embraces the sea, as well as the earth and all things therein.

SKI-ING IN MIDSUMMER AT JASPER PARK

F AIR lovers of winter sports gathered on the Cavell Glacier at Jasper National Park on August 21st, for a try-out on the ash blades. From left to right: Miss Marjorie Neale, Toronto; Miss Flora MacDonald, Edmonton; Miss Doris Neale, Toronto; and Miss Marian Greene, New York City.—C.N.R. Photos.

Man's domination embraces the sea, as well as the earth and all things therein.

RED CROSS NEWS

Mrs. C. B. Waagen, First Vice President and Hon. Secretary of Alberta Division, Canadian Red Cross Society, has recently returned from a tour in the far north of the province in the interests of the Red Cross. Mrs. Waagen was accompanied by Miss West, staff nurse of the Division. Visits were paid to the most northerly outpost hospital of the Red Cross at Pouce Coupe, B. C. where an eight bed hospital is situated. Lectures with lantern views of the work of the Society were shown at many of the northern towns, and greatly enjoyed by everyone, especially the children, who are so familiar with the work done in the Children's hospital at Calgary through the Junior Red Cross branches organized in the schools.

Many women who had been students of the home nursing classes spoke in appreciative terms of the study, and Miss West was able to break new ground in many localities when lecturing on the home nursing course, which is one of the most recent and certainly most valuable efforts of the society. The women's institutes in many districts entertained the Red Cross ladies, and some institutes decided to take up home nursing as the winter study in health. A detailed and illustrated account of this Red Cross trip will appear in the Calgary Herald and

will prove of real interest to all Red Cross friends.

There are no "Idle Wives," despite the picture title. If she has nothing else to do, she works at martyrdom.

If the morals of nations ruled in private life we'd proceed to have "rights" in a certain watermelon patch.

BUY AT HOME SPEND YOUR MONEY IN MACLEOD

Purchases representing thousands of dollars are lost to us, to our trade, to our clerks and employees, to our laborers and artisans, to all the people of Macleod who exist on the products of their work. This money, if spent at home, would help to recreate Macleod financially, give a wider field of activities in business, would be helpful to every resident of this town.

If we purchased regularly from local merchants, this money would circulate in Macleod in a welcome manner. Our merchants merit our patronage; it is to our interest, and the duty of all of us to encourage the local merchant. He is one of us, he lives among us, he has the right to be encouraged by us, he is anxious to have our custom, and to give us satisfaction. We should under all circumstances give him preference, price for price, quality for quality. And nearly always the price that our local merchant asks is, if we compare the quality, just as cheap as that of the outside merchant.

Never purchase merchandise by catalogues from foreign houses before assuring yourself that you cannot procure the same articles, of the same quality (and frequently of better quality) at the same price from your local merchant.

CAPITAL GOSSIP AND PROV. NEWS

Reduce Grain Rates to Coast. Reductions in grain rates from Alberta to the Pacific coast which will mean hundreds of thousands of dollars in saving to the farmers of the province, have come about as a result of an order by the Board of Railway Commissioners equalizing grain rates west-bound with those east-bound.

A. Chard, Freight Traffic Supervisor of the Provincial Government, issued the following statement on the order:

"The announcement from Ottawa that the Railway Board has equalized the grain rates west-bound with those east-bound sounds the death knell to all opposition to the western route, September 2nd, 1925, will go down in history as a red letter day for the Province of Alberta as well as for the Pacific ports, for, as water will run down hill, so will traffic follow the lines of least resistance. The equalized rate in the shorter haul will inevitably produce a smaller cost, consequently Alberta's wheat will export via Pacific ports. Now that the permit system which prevented direct individual shipments being made to Vancouver has been withdrawn, with the prospect of wheat being sold on the Vancouver basis instead of Fort William, the producer is in the position where he can be assured of the advantage of the increased price accruing to him. The specific reductions on mileage basis will make the new rate 18 cents from Calgary and 20 cents from Edmonton to Vancouver, as compared with the old rate

of 22½ cents from both points. The reduction from a point 800 miles distance will be 4½ cents per 100 lbs. To field is 807 miles from Vancouver; taking 800 miles as an average haul, the reduction in cost will be 2 7-10 cents per bushel of wheat.

In 1923 fifty-five million bushels passed through one elevator in Vancouver. With the storage capacity now over four times as great at that port, and a new elevator being constructed at Prince Rupert and no dearth of shipping space, Alberta will experience no inconvenience in sending all her wheat westward this year. If fifty million bushels go this route at a saving of an average of 2 cents per bushel, one million dollars more will remain in the pockets of the Alberta farmers.

"While the specific application on which this judgment was rendered was launched by the Province of British Columbia, it was only a follow-up to the Railway Commission after an appeal to the Privy Council by the Province of Alberta and British Columbia in 1923 against the decision rendered by the Board of British Columbia's application for removal of the mountain differential. After the hearing by the Privy Council, the Board ordered a 10% reduction on the west-bound grain rates, which came into effect in October, 1923. The application was launched by British Columbia and was heard at Vancouver in November, 1924. The Government of Alberta was represented by counsel and its Traffic Officer at that hearing and gave full support to the application from the producers' viewpoint.

"It is noted that the Order is signed by the Chief Commissioner and Commissioner Oliver, three other Commissioners dissenting, but the Chief Commissioner says the order stands and the rates will come into effect September 15, which will cover the most of this year's crop."

Peace River Rates Reduced. Reduction of rates on grain for export from points on the E. D. & B. C. line to the Peace River have been announced by the officers of the C. P. R., which is operating the road. The new rates apply to shipments east and west bound both and will mean a considerable saving to farmers of the Peace River country. The reduction will be round an average of 6 cents per bushel, and there will also be reductions in cost of shipping livestock. Passenger rates are also to be reduced. These reductions will all come into effect September 10.

Agricultural Editors Entertained. The party of 70 American agricultural editors and ladies touring western Canada were entertained at Edmonton this week under the auspices of the Provincial Government, City of Edmonton, and the Edmonton Board of Trade. Owing to wet weather the party did not make the auto tour of the district as planned but were taken in their special train to Fort Saskatchewan during the day where the people of the town served luncheon and a visit was made to the farm of Lord Rodney nearby. A visit was also paid to the university farm at Edmonton, and in the evening the Province and City tendered the guests a banquet and dance.

Convention for Alberta. The Rotary District Conference for western Canada district will be held next year at Banff, Alberta, according to the decision of the Conference at Kenora the past week.

Eighteen Years of Service. After eighteen years of service as a justice of the peace and police magistrate, E. N. Barker, of Lethbridge, has retired, and the Provincial Government has named W. A. Hamilton, of Lethbridge as his successor.

Civil Servants Meet. The convention of the Amalgamated Civil Servants of Canada was held in Edmonton during the past week with a good attendance of delegates.

Will Stay in Alberta. It is announced that Hon. Francis Eaton, of Alton, Alberta, recently succeeded to the title of Lord Cheylesmore, will not go to England to take his position as baron of that title, but will remain in Alberta where he has been engaged in farming for some years.

Good Yield of Wheat. It is announced that threshing returns on the Provincial Jail Farm at Lethbridge have shown a yield of winter wheat on 33 acres of 50.5 bushels an acre on irrigated land. An experimental plot of Garnet wheat gave 40 bushels to the acre.

\$1.66 FOR POOL WHEAT.

WINNIPEG, Sept. 5.—Announcement that the final wheat pool payment for the 1924-25 season would be 11 cents for No. 1 northern, bringing the total payment for the season to \$1.66 a bushel was made her last night by A. J. McPhail, president of the Canadian Co-operative Wheat Producers, selling agency of the prairie provinces.

The actual amount received by shippers to the Alberta pool will be eight cents on No. 1 northern, a deduction of three cents a bushel being made for elevator and commercial reserve funds and administration costs.

4.3 Cents Off, Saskatchewan. REGINA, Sept. 5.—From the 11 cents final payment of the Saskatchewan wheat pool operation and organization expenses, cost of elevator and the commercial reserve of one per cent will account for a deduction amounting to 4.30 cents a bushel, made up as follows:

Two cents a bushel for acquiring elevators, commercial reserve 1 per cent, 1.66; operating and organization expense, .64. Total, 4.30 cents.

The rapid growth of the pool which continues daily despite the fact that harvesting is in full swing, was pointed out by G. W. Robertson, secretary of the pool.

Pool Growing. On June 26, 1924, he stated the membership of the pool was 46,059 representing a total acreage of 6,433,788. On Sept. 2, 1925, it had grown to 63,925 members with an acreage of 8,619,371. One day later the membership reported was 64,268 with a total acreage of 8,679,615.

The figures are for wheat only, those for the coarse grain department of the pool, which is being organized, showing similar increases, the acreage signed up being as follows:

Oats, 1,495,831; barley, 292,638; rye, 62,830; flax, 288,993.

Under the terms of the contract, coarse grain contracts representing a total acreage of 4,782 acres have been withdrawn from the pool. The clause under which this is possible,

It was stated, provided that the pool on Aug. 17 should have signatures representing 33 1-3 per cent of the total crops of oats and barley and 50 per cent of the total crops of rye and flax. These figures must be based on the statistics of the department of agriculture, Saskatchewan, and on Sept. 12 notification will be made by the pool to members to the effect that in none of the coarse grains was the required quota reached. Members then will have until Sept. 20 in which to withdraw.

Only 40 members so far have withdrawn, it is stated.

REGULAR MEETING OF TOWN COUNCIL. Minutes of regular meeting of town council, held in town offices on Tuesday evening, Sept. 8.

Present: Mayor J. W. McDonald; Councillors C. W. Stevens, A. McLeod and W. A. Day.

McLeod-Day—That minutes of 17th August, as read, be adopted.—Carried.

Mr. Ottewill appeared before the council re rental of stable on McNeil lot, 17 N. 18th street.

Messrs. Mercer and Fawcett met the council re selection of site for Cairn to be erected commemorating advent of the N. W. M. Police.

Chief of police report laid over. Stevens-Day—That Dr. Elder be appointed medical health officer for the balance of the year at a salary of \$20 per month, and that Mrs. Kirk be given cheque for her husband's August salary, \$20.—Carried.

Day-McLeod—That matter of improvements on buildings rented by Mr. McLean be left in the hands of the works and property committee.—Carried.

Stevens-Day—That we adjourn till next regular meeting.—Carried.

Going to jail is much like a vacation. The enjoyable part is getting back.

A wife is a person who wishes to know, in the midst of your favorite story, if you will have some more coffee.

The WHITE HALL

THE HEADQUARTERS IN MACLEOD FOR FRUITS

LOCAL AND PERSONAL NEWS

Mrs. E. J. Winchcombe is visiting friends at Spring Point.

Beert Nauta and Jan. Weestra of Granum were visitors in town on Tuesday.

Speaking of crops of wheat, W. Hovis, who is farming south of Macleod, delivered his first wheat at the elevator on Thursday, September 3, which is yielding 47 bushels per acre, and 67 pounds to

the bushel. The kernels are all well formed, a good color, and even in size.

M. Genge, formerly of Macleod and now of Westlock, Alta., is in Macleod visiting his mother and sisters.

Ernie Ringland is around again after his severe illness. He was able on Tuesday to "make the Great West Saddlery," his longest trip. It was

a real pleasure to see him around again.

Born—to Mr. and Mrs. P. Strain, at Hazelton, on Thursday, Sept. 3rd, a son.

John Ringland is confined to his bed with lumbago or some other equally painful rheumatic affliction.

R. M. Reid motored to Blairmore, Coleman and Bellevue last week, spending Thursday and Friday at these places.

The Hutterite Brethren are adding to their holdings, having recently purchased another quarter section from Charles Butcher.

Mrs. C. D. T. Becher and Miss Lilian returned to Macleod on Tuesday last, after an enjoyable holiday of two months spent in Vancouver.

Ernest McCrea and wife and Miss Lilian McCrea spent the holiday at Coleman with the parents of Mrs. McCrea, who have recently moved to Coleman from Springhill, Nova Scotia.

Charlie Reach had the misfortune to have his arm severely cut this week while cranking a car for a friend. The engine backfired, the crank hitting his arm and making a nasty cut requiring four stitches.

On Wednesday afternoon fire totally destroyed the house and furniture on the Driver farm, about 18 miles south of Macleod. It appears that Mrs. Driver was visiting at a neighbor's when two men noticed smoke coming from the house. They rushed over and managed to save a trunk and some money that was in the house, but everything else was totally destroyed. Mr. Driver had only this spring practically refurnished the place, and had also painted and improved the building. There was no insurance carried either on the house or the contents and the owner, who was away from the place at the time of the fire, will be at a loss of about two thousand dollars.

A pleasant evening was spent in the Parish hall Wednesday, Sept. 2, when the friends of Mrs. Kerr Seymour gathered to say farewell to her before she leaves for Calgary, where she will in future reside with her son. Mrs. Seymour has been in Macleod for some years and has been a faithful teacher of the younger class in instrumental music, and has today a large class, from the beginners to the advanced pupils. Many in Macleod and district have taken their training from her and are holding positions as instructors. It was an impromptu affair under the auspices of the church, to which she belongs. Her music class presented her with silverware and flowers, while the address was made by His Worship Mayor McDonald, after which a musical hour was enjoyed by the many present.

When you require Fresh Flowers of Superior Quality, or floral designs artistically arranged at moderate prices—Phone Reach & Co. 4-11

ALBERTA RETURNING OFFICERS ARE NAMED

OTTAWA, Sept. 3.—The list of federal election returning officers for Alberta is now complete, as follows:

Calgary East, G. A. Trainor; Calgary West, Thomas A. Wright; Edmonton East, H. B. Howitt; Edmonton West, Joseph Driscoll; Peace River, E. H. Sheppard of Beaver Lodge; Acadia, C. N. Pringle of Hanna; Athabasca, Isaac Gagnon of Donaville; Battle River, W. J. Shortreed of Hardisty; Bow River, Col. D. Caswell of Drumheller; Camrose, C. V. Bennett of Stettler; Lethbridge, D. H. Elton of Lethbridge; Macleod, Neil Nicholson of Granum; Medicine Hat, J. A. King of Medicine Hat; Red Deer, A. C. Bury of Olds; Vegreville, R. A. Harrison of Lamont; Wetaskiwin, N. A. Johnson of Wetaskiwin.

U. S. AIR CRUISER CRASHES—FOURTEEN KILLED.

CALDWELL, Ohio, Sept. 3.—The giant dirigible Shenandoah of the United States navy is no more. It went down in three pieces here early today and killed its commander, Lt. Commander Zachary Lansdowne, and at least 13 of the officers and men making up her crew.

The airship struck a line squal—a variety of storm most feared by airmen—shortly after 5 o'clock this

morning near Noble county village, while traveling at an altitude of 3,000 feet en route from Lakehurst, N. J., to the west.

WASHINGTON, Sept. 3.—The air cruiser Shenandoah crashed in a windstorm eight miles north of Caldwell, Ohio, this morning, the navy department was informed in a message. The message said two men were killed and that the big airship was a total wreck.

The message said: "Shenandoah down eight miles north of Caldwell, Ohio. Reported a total wreck and two men killed. Caldwell is two miles north of Belle Valley, 20 miles southeast of Cambridge, near Columbus. Windstorm caused the wreck."

The Shenandoah reported to the navy department by radio on leaving Lakehurst that 42 officers and men were aboard.

Forty Fatherless Children Mourn Shenandoah Dend.

LAKEHURST, N. J., Sept. 4.—Forty children left fatherless by the naval dirigible Shenandoah, ill-fated western trip, were mourning today in their homes near the naval air station, headquarters of the lost airship.

Correct this sentence: "He has a lot of authority now," said the man, "but he's the same old humble fellow."

REACH & COMPANY, Ltd.

GENERAL MERCHANTS, GROCERIES, FRUITS AND VEGETABLES

We promised you the last few weeks to advertise at cost and give you the greatest show of your lives. Women's silk wool and mercerized cotton underwear. It gives you the most delicious feeling possible. In church you have that independent feeling that you won't have to surreptitiously rub yourself where rough underwear is used. In vulgar language you have to scratch the affected part. You are always uncomfortable. Now, this underwear has no sleeves, just an opera strap, with full dress opera style. We sold these at \$2.75 a suit. But to get you interested we offer them to you at \$1.50. Your general department on the street will be an undeniable fact that you are wearing silk or silk and wool goods next to your skin. If your underwear is comfortable you feel and show it in your walk, having a graceful elasticity. We don't forget the kiddies. We absolutely guarantee our cough and croup medicine. It has saved many lives in our vicinity. Still one more of our visible signs of affection for kids is a new way of taking castor oil. The oil is in chocolate tablets and after they are eaten the trick is done. All you have to wait for is the results, while the castor oil is roaming in its little tummy.
